[50 Climate Solutions from Cities in the People's Republic of China](#)

This publication showcases 50 innovative case studies from cities in the People's Republic of China that are mitigating against and adapting to climate change.

Solutions being implemented in these cities are proving that reducing carbon dioxide emissions and protecting the environment need not sacrifice economic prosperity. This publication is an initiative of the Asian Development Bank to support efforts of the People's Republic of China to address climate change and showcase innovations in low-carbon city development. The sharing of these examples could inspire other cities and drive further innovation.

[The 2nd International Conference on Green Urbanism](#)

(5th to 7th December 2018)

Green urbanism is an attempt to create a more sustainable place, using fewer resources. By putting together the term “green” and the study of “urbanism” and despite its promise of a sustainable, energy-efficient and developed world, we are still faced with deep challenges
