

## Special feature: Infrastructure, Technology and Resilience

### Infrastructure, Technology and Resilience

Cities face growing challenges from both natural and man-made sources. Professor Alexander Zehnder argues that a commitment to developing and funding innovation, technical systems, environmental science, and infrastructure engineering can help localities improve their resilience.

### Towards Inclusive Cities

### About

The Lee Kuan Yew World City Prize is a biennial international award that honours outstanding achievements and contributions to the creation of liveable, vibrant and sustainable urban communities around the world.

The Prize is awarded to cities and recognises their key leaders and organisations for displaying foresight, good governance and

Cities accommodate more people today than they did at any time in history. According to the United Nations' projections, 2.5 billion people will be added to the world's urban population by 2050, with nearly 90 per cent of the increase concentrated in Asia and Africa.

While cities have long been thought to be engines of economic growth, they must also complement this growth with inclusion in mind. With more than 180,000 people moving to cities every day looking to tap into the shared prosperity that urbanisation brings, it is now more important than ever for city authorities to plan for inclusive cities.
