

A revolution is underway in the fields of city planning, policy, operations, and management; public policy and public administration; and health administration. Don't miss out on this incredible opportunity to advance your career and broaden your knowledge now by earning a **Master of Public Informatics (MPI) at Rutgers University**. <http://informatics.rutgers.edu>

The **Edward J. Bloustein School of Planning and Public Policy at Rutgers, The State University of New Jersey** is a leader in the fields of planning, public policy, and health, offering diverse and flexible graduate programs that provide each student with the opportunity to frame a course of study tailored to her or his individual needs. The programs are built around a common core of required courses plus areas of specialization.

**Apply now for Fall 2019 - Deadline July 1st. Scholarships still available! Apply now at**  
<https://grad.admissions.rutgers.edu/GraduateProgram/Detail.aspx?code=34816&degree=MPI>

The limiting factor to the successful use of **big data** is the skill set of traditionally trained analysts and administrators who are not familiar with advanced computational tools and data management techniques. **Public informatics** is an interdisciplinary field that uses statistical methods, computer algorithms, and systems thinking to extract knowledge or insights from data in various forms, either structured or unstructured. Cross-trained professionals with skills in public applications of information science are needed to address this training gap.

One of the greatest advantages of the **Rutgers MPI program** <http://informatics.rutgers.edu> is our faculty. We have selected world-class professionals that have substantial real-world experience. Furthermore, as one of a highly selected few universities classified as "RI: Doctoral Universities— Highest Research Activity," Rutgers has developed close relationships with organizations throughout the region, putting us ahead of our competitors.

The Bloustein School's **Master of Public Informatics program** <http://informatics.rutgers.edu> provides the vehicle for educating professional student cohorts in the competencies needed in public informatics: statistics, programming, data management, data analytics, visualization, spatial analysis, applications and the integration of these skills. Graduates of the program will bring a critical voice and a deep understanding of context to an emerging field.

As the summer approaches, we would like to remind you that we are now accepting applications to our **Master of Public Informatics program** <http://informatics.rutgers.edu> for September 2019. All applications must be received by **JULY 1st** in order to be considered for merit-based scholarships, fellowships or assistantships.

**Application Requirements:**

- Online application form
- Application fee
- Baccalaureate degree from a nationally/internationally accredited program, with official transcripts from all institutions
- Resume/CV
- Three (3) letters of recommendation
- GRE general, GMAT or LSAT test
- TOEFL/IELTS required for non-U.S. applicants. Scores will be accepted up to five years from their issuance.
- Personal statement

**Apply now at <https://grad.admissions.rutgers.edu/GraduateProgram/Detail.aspx?code=34816&degree=MPI>**

If you have any questions about the deadline, application process, or academic programs, please feel free to contact the school at [recruit@ejb.rutgers.edu](mailto:recruit@ejb.rutgers.edu) or 848-932-2388.

All the best,  
Frank Felder, Ph.D.  
Research Professor and Director,  
Bloustein School Master of Public Informatics Program
