PEDAGOGICAL METHOD
RECONNECTING WITH YOUR CULTURE
THE SCHOOL OF THE WORLD

http://esempidiarchitettura.it/sito/rwyc-pedagogical-method/
MAIN PURPOSES

In a complex historical phase in which capitalist priorities have strongly questioned ethical values and human relations, there is a need to put the person and his creativity back at the center. The fragility, which all countries have manifested within the cultural and educational sector, has allowed developing fundamental reflections to give a “new centrality” to the role of Culture for the sustainable development of humanity. In fact, without Culture it becomes difficult to develop future perspectives capable of developing shared and participatory policies that are no longer entrusted to the growing individualization.

Analyzing the realities of different countries of the world, from the Far East to the far West, there is a need to activate a new “humanism” and for this reason, it is necessary that Culture enters fully into the whole ideation of the new and innovation on which it is important from now on to invest.

To do all this, however, we must start from the younger generations and then plant seeds to obtain good fruits and therefore a very good harvest in the near future. We must, therefore, be able to design educational programs that can build a better world.

Based on these premises the international project RECONNECTING WITH YOUR CULTURE was born, promoted by the EdA Esempli di Architettura (Italia) in collaborazione con il Forum UNESCO University and Heritage (Spagna); Factor Cultura (Peru); ICOMOS – Comitato Internazionale Monumenti e Siti (Italia y Peru), Do.Co.Mo.Mo. International, circoscrizione per la conservazione del patrimonio moderno (Portogallo), REACH-Culture European Union’s Horizon 2020 (EU), la Fondazione Stepán Zavrel (Italia) e la partecipazione di docenti della Universidad de Bogotà Jorge Tadeo Lozano (Colombia), Institute for International Studies, Yokohama (Giappone); il Museo Archivo de Arquitectura del Ecuador in Quito (Ecuador), l’Instituto Educación Secundaria Anaga, Tenerife (Spagna); Kanto Gakuin University, Yokohama, (Giappone); Blanco-Uribe & Asociados, Caracas (Venezuela) e l’Istituto Nazionale di Architettura Sostenibile (Italia).

The project is aimed at primary and secondary schools around the world and dedicated to the young generation from 5 years old to 17 years old. The children, assisted by their teachers, are invited to make an exploratory journey within the cultural heritage of their country and to draw and tell their experience of knowledge in contact with the historical, artistic, and cultural heritage.

The international project also aims to analyze the different cultural approaches and methods of analysis developed in different communities around the world to build a network and to allow the sharing of experiences and initiatives. The project is coordinated by Colombian artist Kevin Alexander Echevery Bucuru of the Universidad de Bogota Jorge Tadeo Lozano, with the scientific supervision of Professor Olimpia Niglio, director of the international research center EdA Examples of Architecture that has been working between the American and Asian continents for years for the enhancement of cultural diversity.

All the information to participate in the international call is available on the web page http://esempidiarchitettura.it/sito/edakids-reconnecting-with-your-culture/

The languages of the project are those of UNESCO and ICOMOS: English, French, and Spanish.

The international project has started July 20, 2020
