

The University of Manchester seeks to appoint a Lecturer in Urban Design and is looking for applications from candidates who specialise in urban design practice and the delivery of urban design projects through a technical and applied studio-based approach. In particular, we seek candidates who can evidence a commitment to teaching/delivering contextually responsive urban design interventions at multiple scales, and who have skills in utilising a wide range of urban design techniques and software in the development and delivery of design proposals. With an established urban design teaching team and postgraduate master's programme in place, the successful candidate must have the ability to work collegially within this structure to deliver existing studio modules and assist in the design of new and innovative curriculum.

Please see details below:
