

Urban and regional studies, KTH, now announce a 2-year post-doc position

KTH www.kth.se

The area of study is the impact of professional roles on the result of planning; how collaborations are set and performed and the relation to the outcome, in relation to sustainability. The focus can be on development and change in existing built environment, on new establishments and areas, infrastructure projects as well as processes aiming for conservation of nature or cultural values. This includes differences in policy context and institutional settings, and investigates for example conflicts within collaboration, creation of meaning and values in relation to understanding based in professional knowledge and formulation of problems, approaches and expected results
